PREFACE TO THE SECOND EDITION

—:O:—

In presenting this Second Edition of the First Primer in Chimanyika, we would call the attention of the teacher to several changes which, we think, will prove to be helpful. The pages are larger and more space is given to each lesson. The names of the letters in Chimanyika have been asked for, as well as a fuller explanation of the sounds of the letters, both of which should be mastered by the pupil before doing much reading. A system of reviews runs all through the book which, if followed, will help both teacher and pupil. The book is for the use of natives who know how to speak their language but do not know how to read it. The book was not prepared for the use of white people who desire to learn the language tho some have found it a help. The vowels and single consonants only are used in this First Primer. The double consonants and sounds peculiar to the language may be found in a Second Primer which was published last year.

E. H. GREELEY.

OLD UMTALI,
JULY, 1913.

The Alphabet.

All the letters of the English Alphabet are used except two, which are not needed to spell Phonetically.

There is little or no use for 'l' in this language. 'C' is not used alone, but 'ch' has the sound of 'ch' in church. 'G' is always hard as in get, gone, give. There is no 'q'. Its place is taken by 'kw'. There is no 'x'. Its place is taken by 'ks'.

The double consonants and peculiar sounds, none of which except 'ch' appear in this book, are given in the Second Primer.

The following tables show the names and sounds of the letters in Chimanyika.
